Consultation Report - Test

Generated 2026-10-22

Summary

Your heart rate is 119 bpm, which is an increase from your previous reading of 113 bpm and marks a rising trend over your last three records. Your systolic blood pressure has moved from a normal reading of 128 to an elevated reading of 135, while your diastolic blood pressure has also increased from 86 to 91. Additionally, your blood glucose level has risen from 4.2 to 6.2 since your last check. These specific measurements show an upward trend and have been flagged for review. Please discuss these findings with a qualified healthcare professional.

Notable changes over time

- Heart Rate: 119 bpm (Your heart rate has increased from 113 to 119 since your last record (worsened - moved further from the typical reference range).)
- Systolic Blood Pressure: 135 mmHg (Your systolic blood pressure has changed from normal (128) to elevated (135) since your last record.)
- Diastolic Blood Pressure: 91 mmHg (Your diastolic blood pressure has increased from 86 to 91 since your last record (worsened - moved further from the typical reference range).)
- Blood Glucose: 6.2 mmol/L (Your blood glucose has increased from 4.2 to 6.2 since your last record (worsened - moved further from the typical reference range).)

Note

- Trends are based only on the records provided and are not a diagnosis. Please confirm with your doctor.
