

Consultation Report - Test

Generated 2026-10-10

Summary

Your heart rate has increased from 54 to 88 beats per minute since your last record. Both your systolic blood pressure, now 134, and your diastolic blood pressure, now 86, have also increased and are assessed as worsened. Additionally, your blood glucose has moved from 4.6 to 6.3, which is a worsening from your previous measurement as it moves further from the typical reference range. Please discuss these findings with a qualified healthcare professional.

Notable changes over time

- Heart Rate: 88 bpm (Your heart rate has increased from 54 to 88 since your last record (worsened - moved further from the typical reference range).)
