

Consultation Report - Test

Generated 2026-10-10

Summary

Your current heart rate of 138 beats per minute and blood pressure of 188/122 are at levels that usually warrant prompt medical attention. Additionally, your blood glucose reading of 15.4 is also at a level requiring urgent review. These findings fall outside typical safe ranges, so you should consider contacting a healthcare professional promptly instead of waiting for your next scheduled appointment. Please discuss these results with a qualified healthcare professional.

Notable changes over time

- Heart Rate: 138 bpm (2 readings recorded; no significant change since the last visit.)
