

Consultation Report - Test

Generated 2026-10-10

Summary

Your systolic blood pressure has improved from 188 to 98 and your diastolic blood pressure has improved from 122 to 62 since your last record. Your blood glucose has also improved, decreasing from 15.4 to 4.6, and your heart rate has improved from 138 to 54. These measurements have all moved closer to the typical reference range compared to your previous readings. Please discuss these findings with a qualified healthcare professional.

Notable changes over time

- Heart Rate: 54 bpm (Your heart rate has decreased from 138 to 54 since your last record (improved - moved closer to the typical reference range).)
- Systolic Blood Pressure: 98 mmHg (Your systolic blood pressure has decreased from 188 to 98 since your last record (improved - moved closer to the typical reference range).)
- Diastolic Blood Pressure: 62 mmHg (Your diastolic blood pressure has decreased from 122 to 62 since your last record (improved - moved closer to the typical reference range).)
- Blood Glucose: 4.6 mmol/L (Your blood glucose has decreased from 15.4 to 4.6 since your last record (improved - moved closer to the typical reference range).)
