Consultation Report - Test

Generated 2026-10-13

Summary

Your heart rate was measured at 138, which is a level that usually requires prompt medical attention. Both your systolic blood pressure of 188 and diastolic blood pressure of 122 have also been identified as urgent findings. Furthermore, your blood glucose reading of 15.4 is at a level that typically warrants immediate medical review. These measurements fall outside of typical safe ranges. Please discuss these specific results with your doctor or a qualified healthcare professional.

Notable changes over time

- Heart Rate: 138 bpm (5 readings recorded; no significant change since the last visit.)
- Systolic Blood Pressure: 188 mmHg (5 readings recorded; no significant change since the last visit.)
- Diastolic Blood Pressure: 122 mmHg (5 readings recorded; no significant change since the last visit.)
